

5] Flowchart to check no. is positive or negative in Java.

6] Flowchart to check number is leap year or Not.

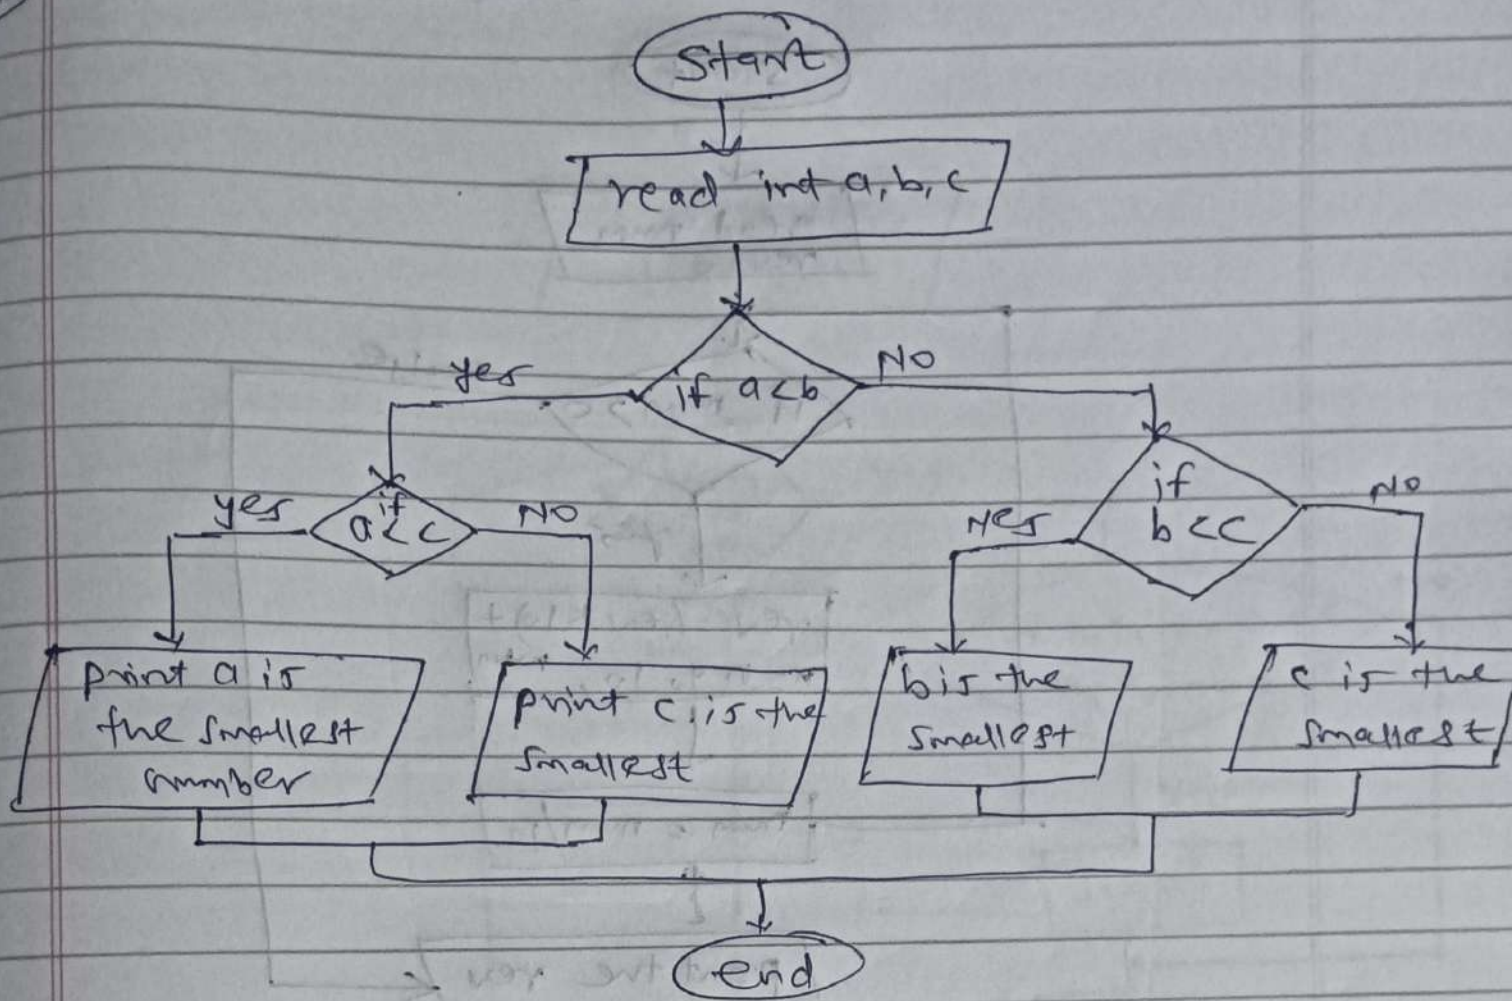

10) Flowchart to find Sum of digits of a given number

10) Algorithm to find Sum of digits of number

- 1) Start
- 2) declare $\text{sum} = 0$
- 3) Get the input
- 4) if $\text{num} > 0$ is true then $\text{num} = \text{num} \% 10$;
 $\text{sum} = \text{sum} + \text{num}$ repeat until $\text{num} = 0$
- 5) print sum
- 6) Stop

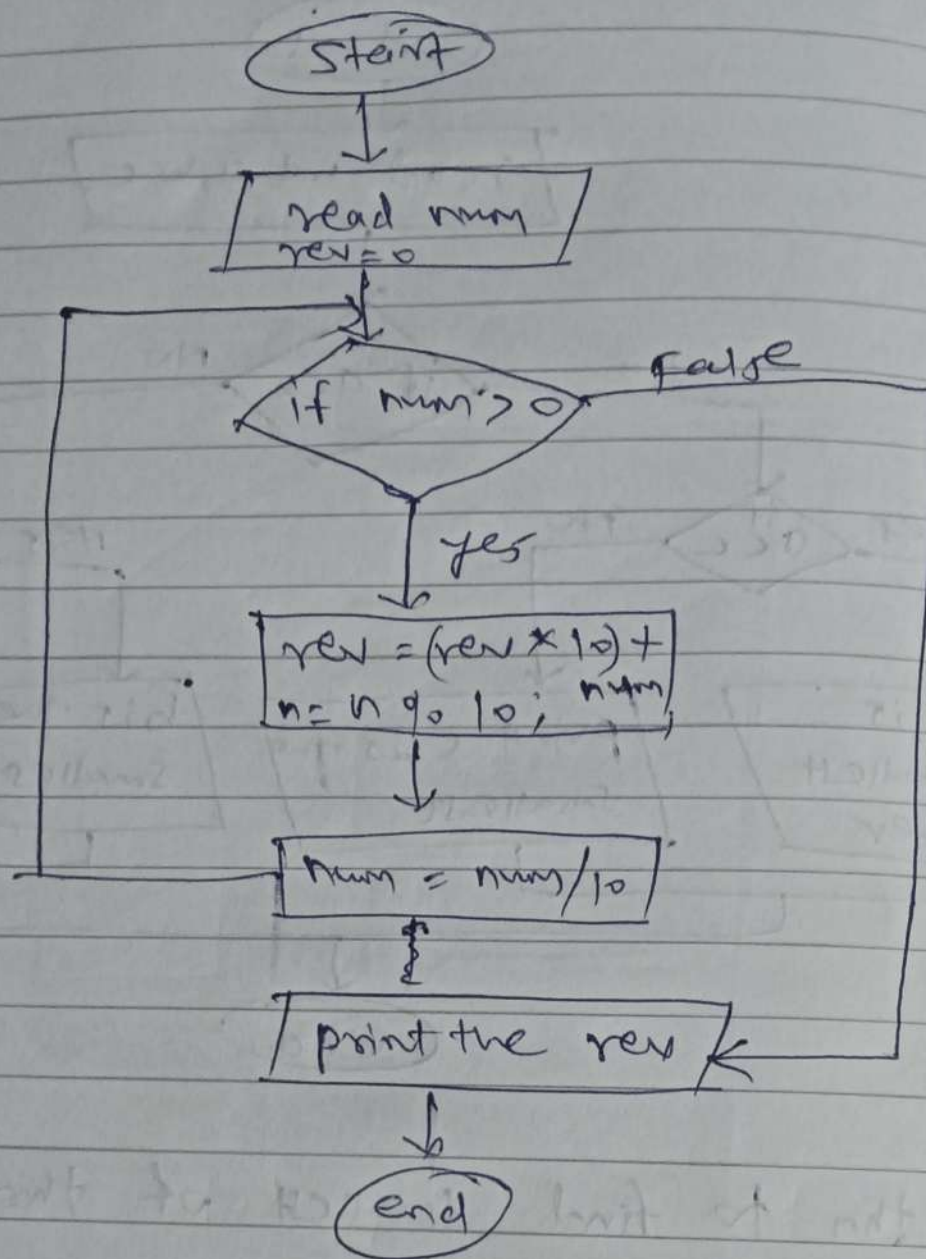

ii) Flowchart to find Smallest of three numbers.

ii) Algorithm to find Smallest of three numbers.

- 1) start
- 2) get input a, b, c
- 3) if $a < b$ is true goto ④ else goto ⑤
- 4) check for $a < c$ if it is true print a is the smallest number else print 'c' is the smallest number
- 5) check $b < c$ if it is true b is the smallest else 'c' is the smallest number.
- 6) Stop

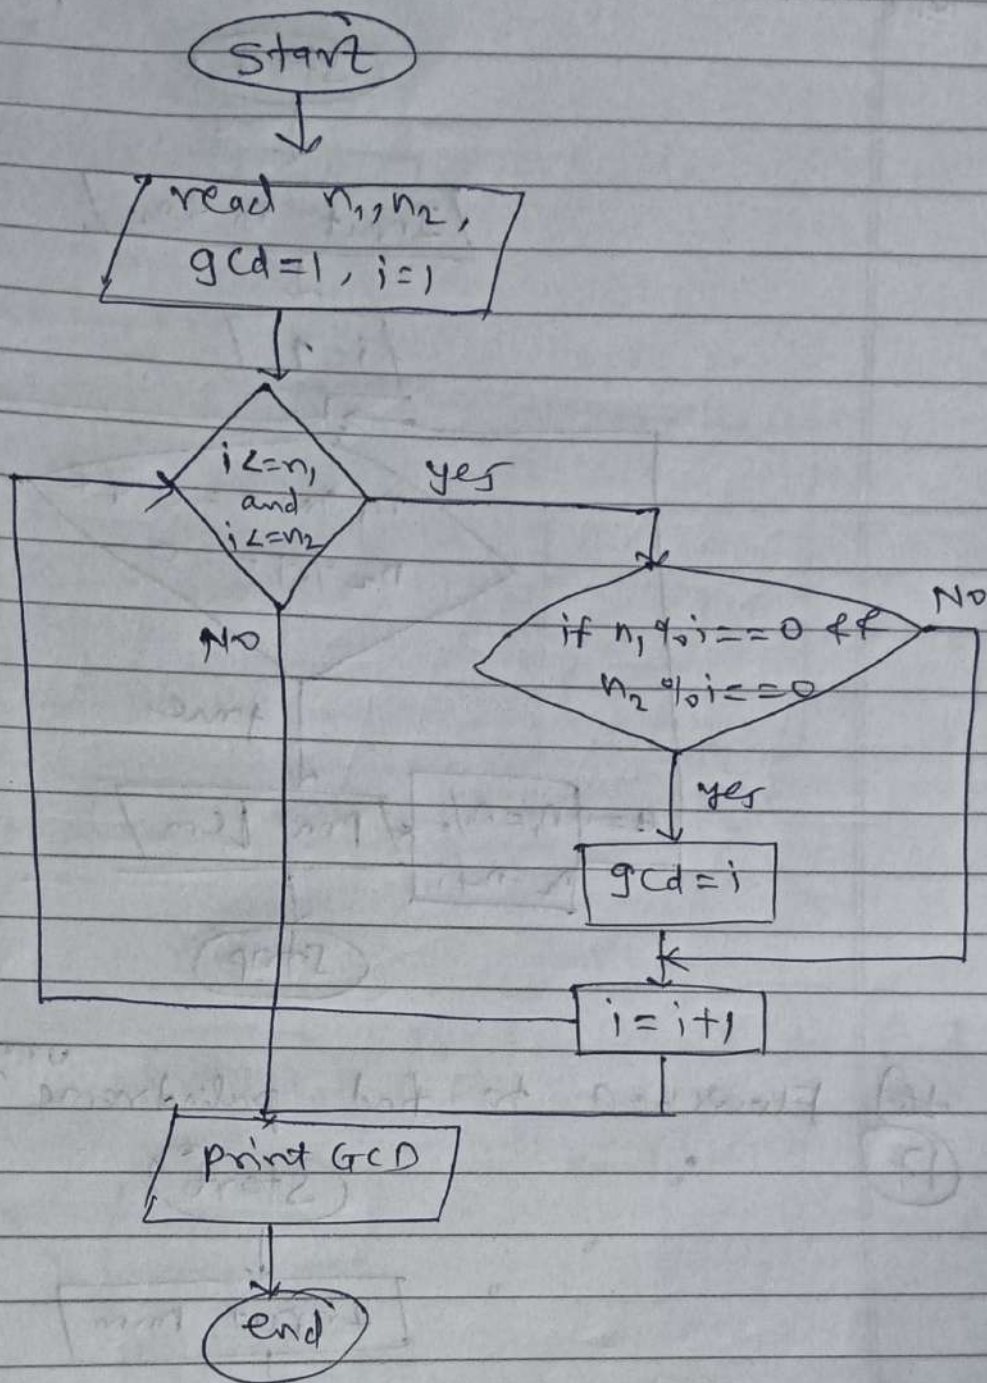

13) Flowchart to reverse a given number

13) Algorithm to find the reverse of a given

- 1) Start
- 2) declare $rev = 0$
- 3) get the input
- 4) if $num > 0$ is true $rev = (rev \times 10) + num$
 $n = n \% 10$ else go to (6)
- 5) $num = num / 10$
- 6) print the num
- 7) Stop

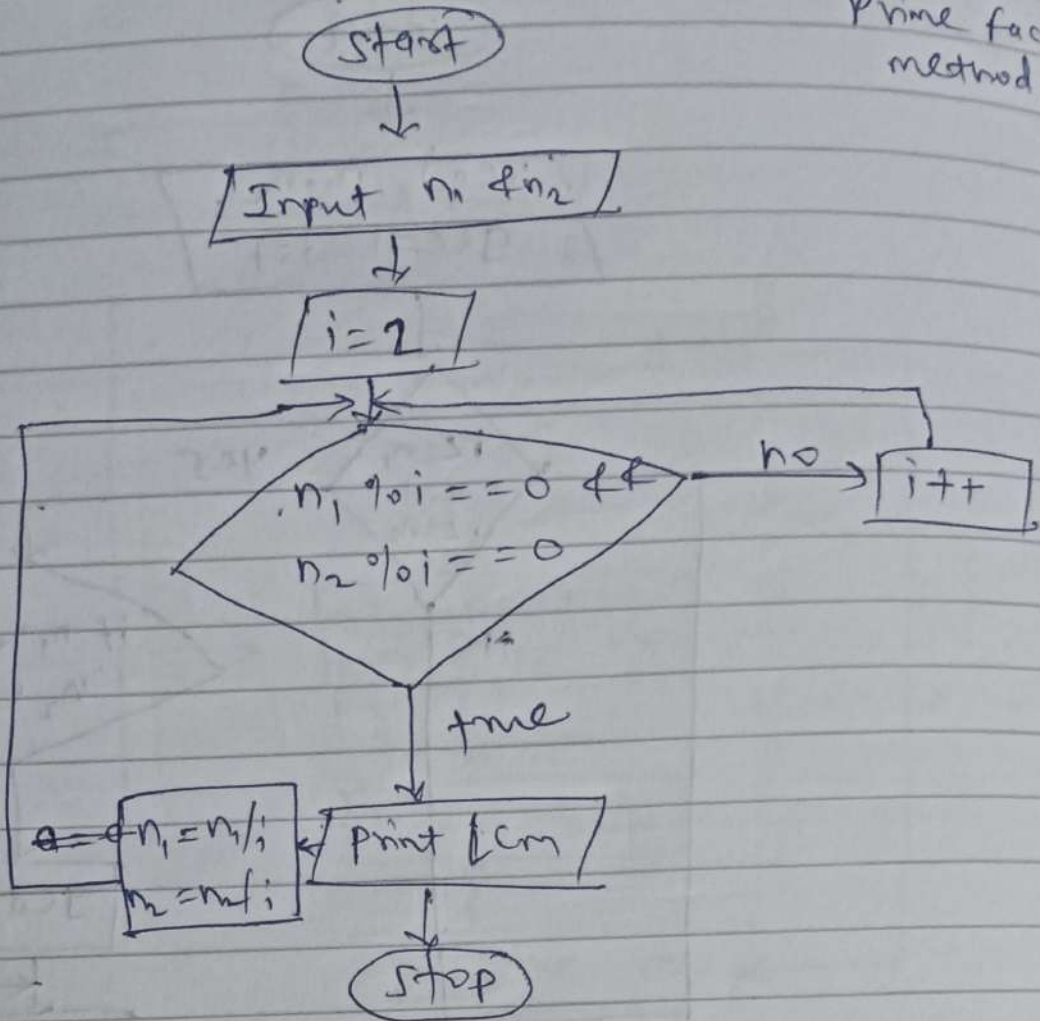

14) Flowchart to find GCD of two given numbers.

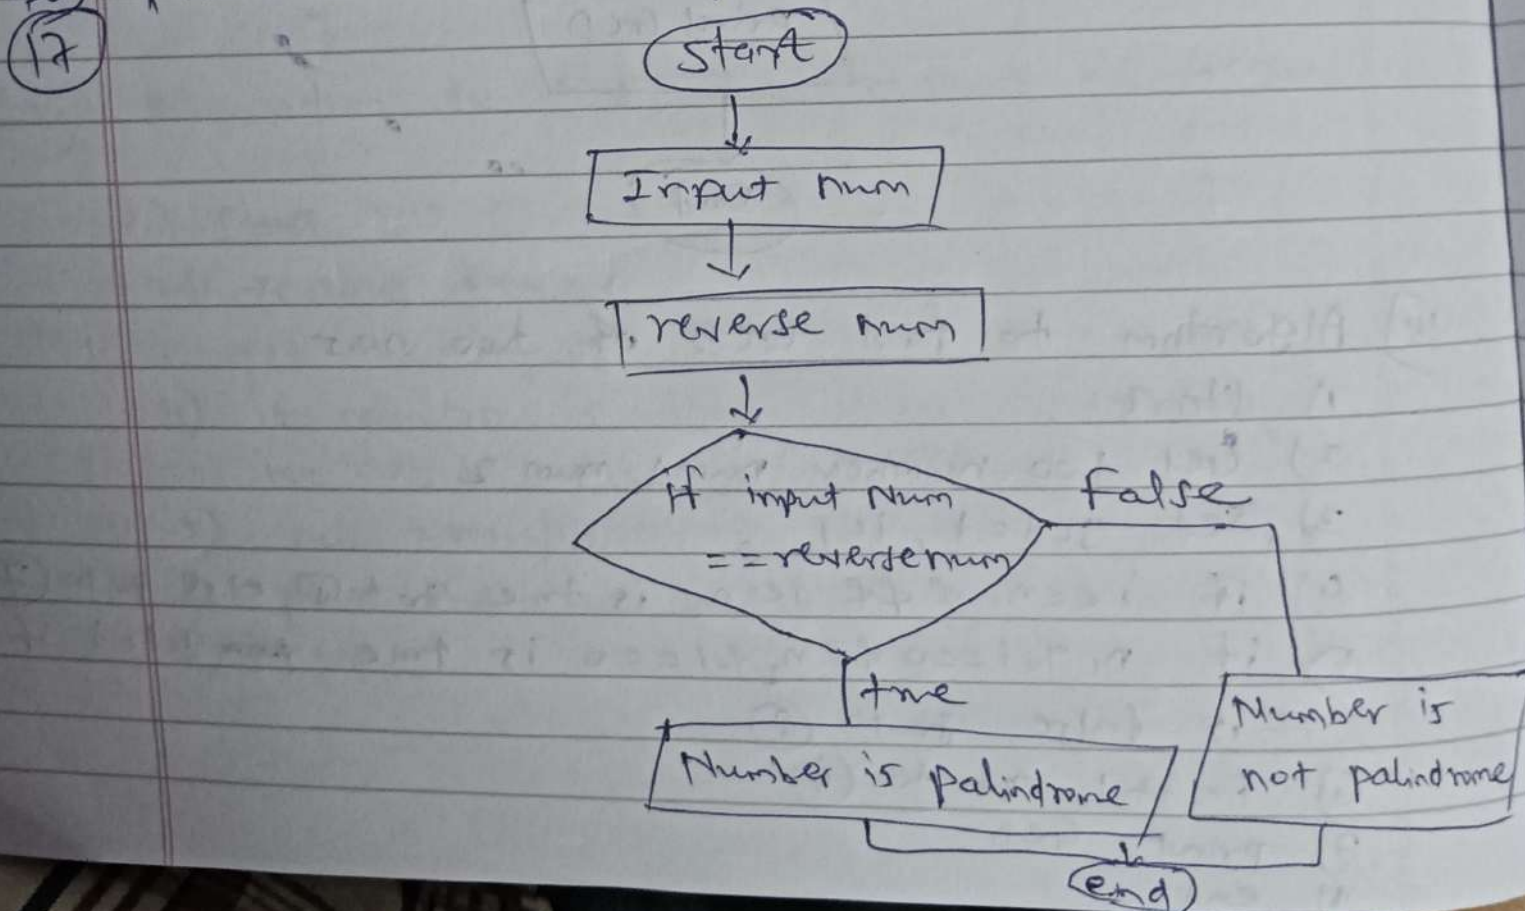

14) Algorithm to find GCD of two nos

- 1) Start
- 2) Get two number num1, num2
- 3) Set $gcd=1, i=1$
- 4) if $i \leq n_1$ && $i \leq n_2$ is true go to ⑤ else go to ⑦
- 5) if $n_1 \% i == 0$ && $n_2 \% i == 0$ is true ~~print~~ $gcd=i$ if it is false go to ⑥
- 6) $i = i + 1$ go to ④
- 7) print GCD
- 8) end

15) Flowchart for LCM of two positive integers using Prime factors method.

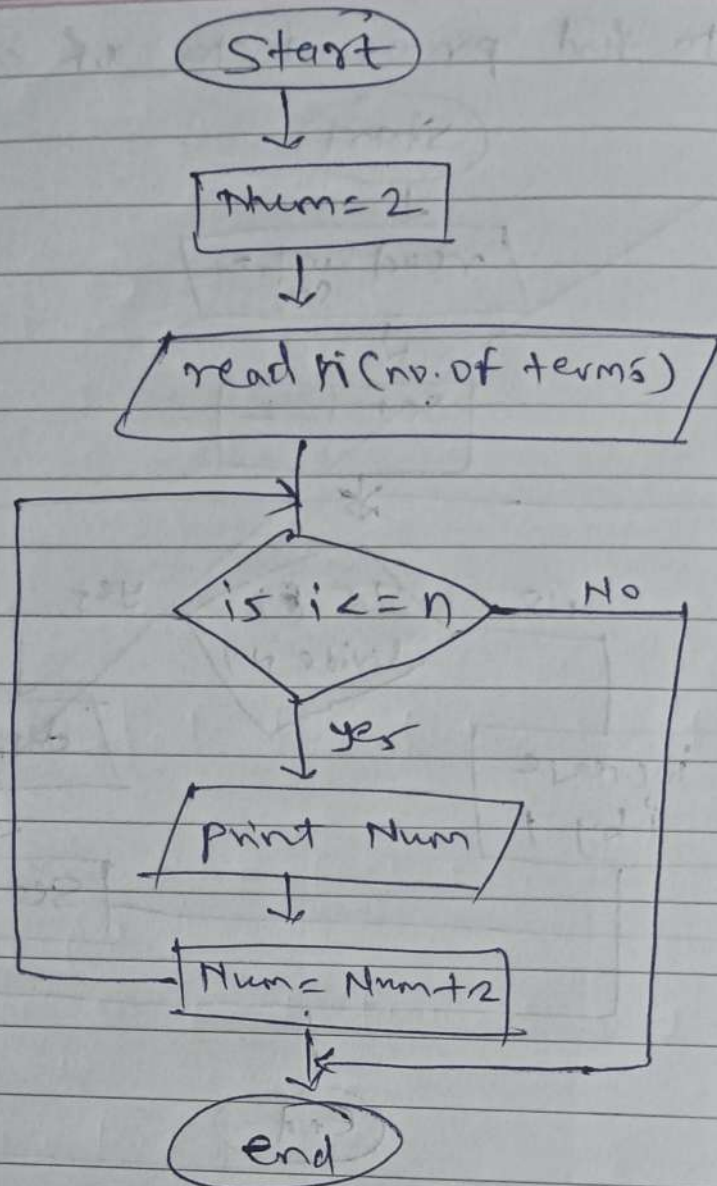

16) Flowchart to find palindrome or not of a number

Flowchart to print even number series.

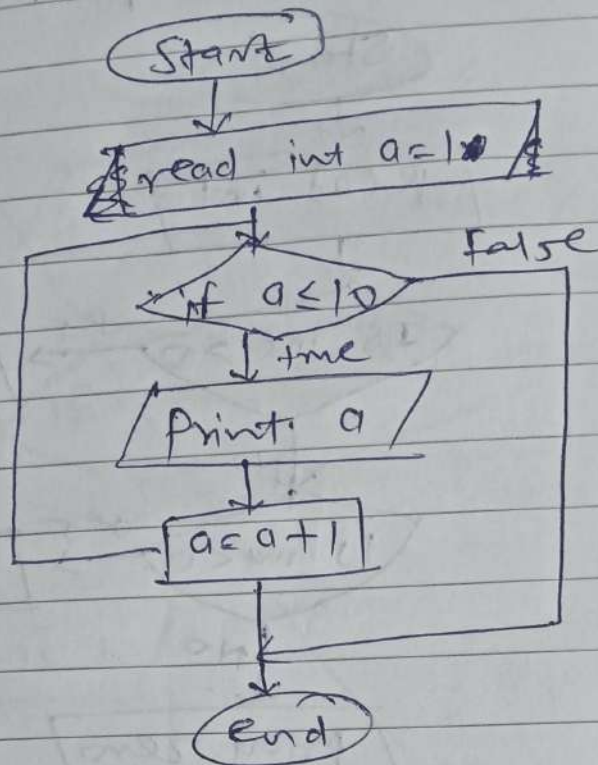

19]

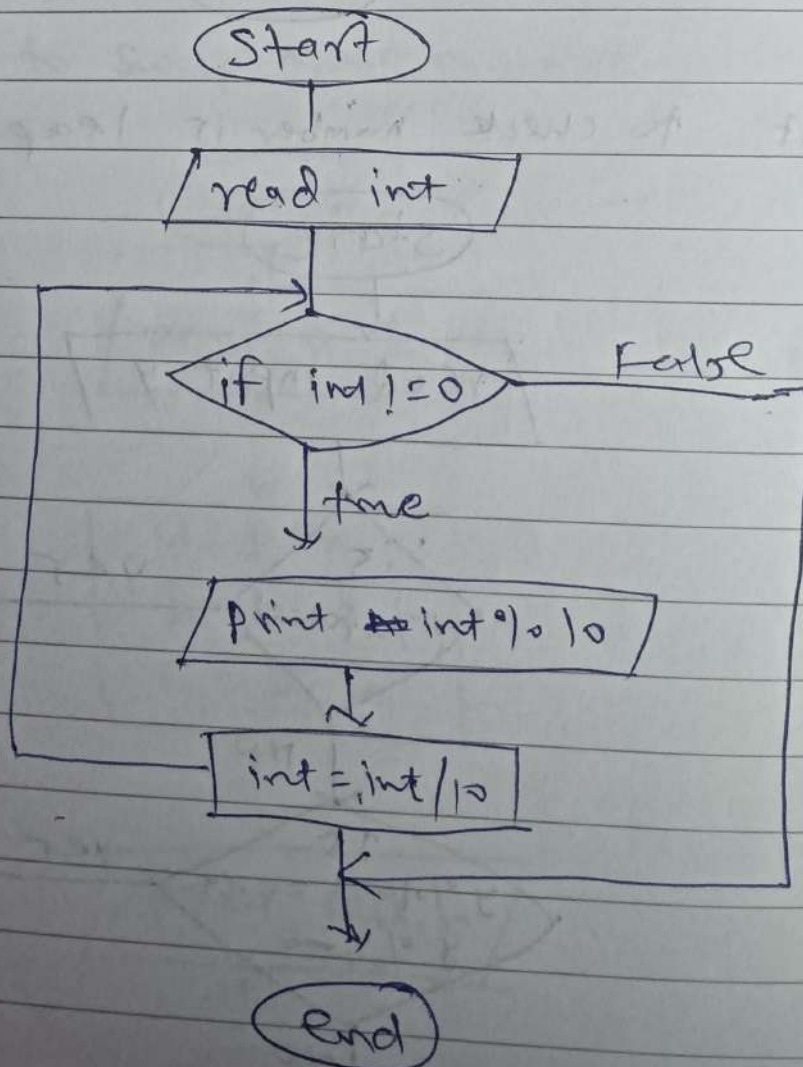

19) Algorithm to print even series

- 1) Start
- 2) Num = 2
- 3) read the input
- 4) is $i \leq n$ is true go to 5) else go to 7)
- 5) print Num
- 6) Num = Num + 2 go to 4)
- 7) end

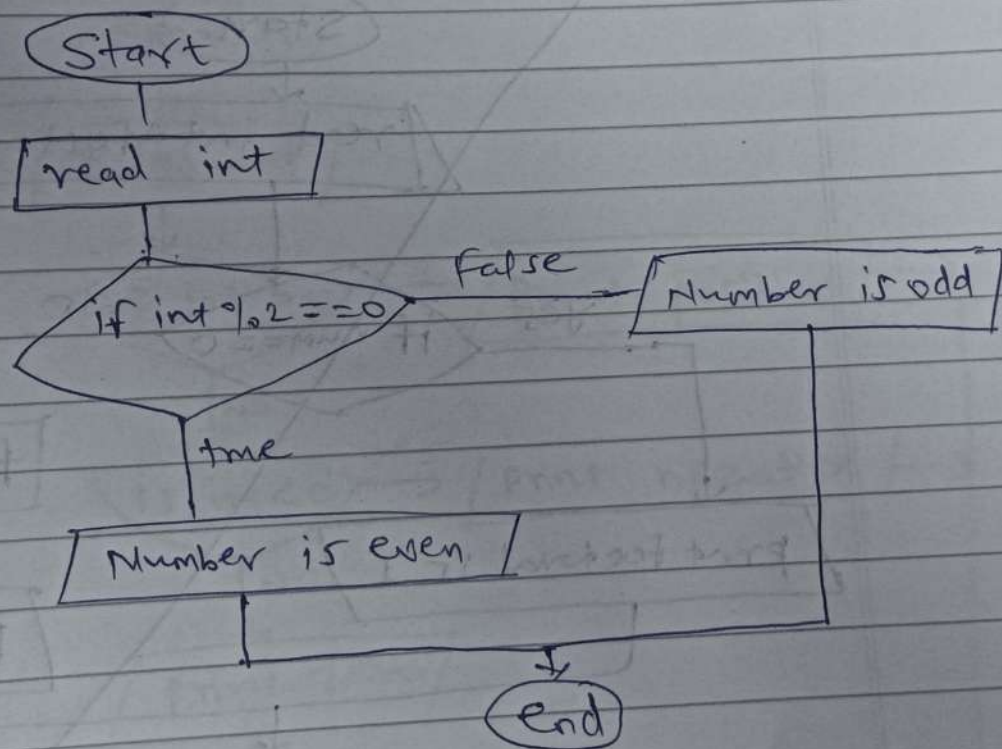

7) to print 1-10 without using loop.

8) to print digits of a given number

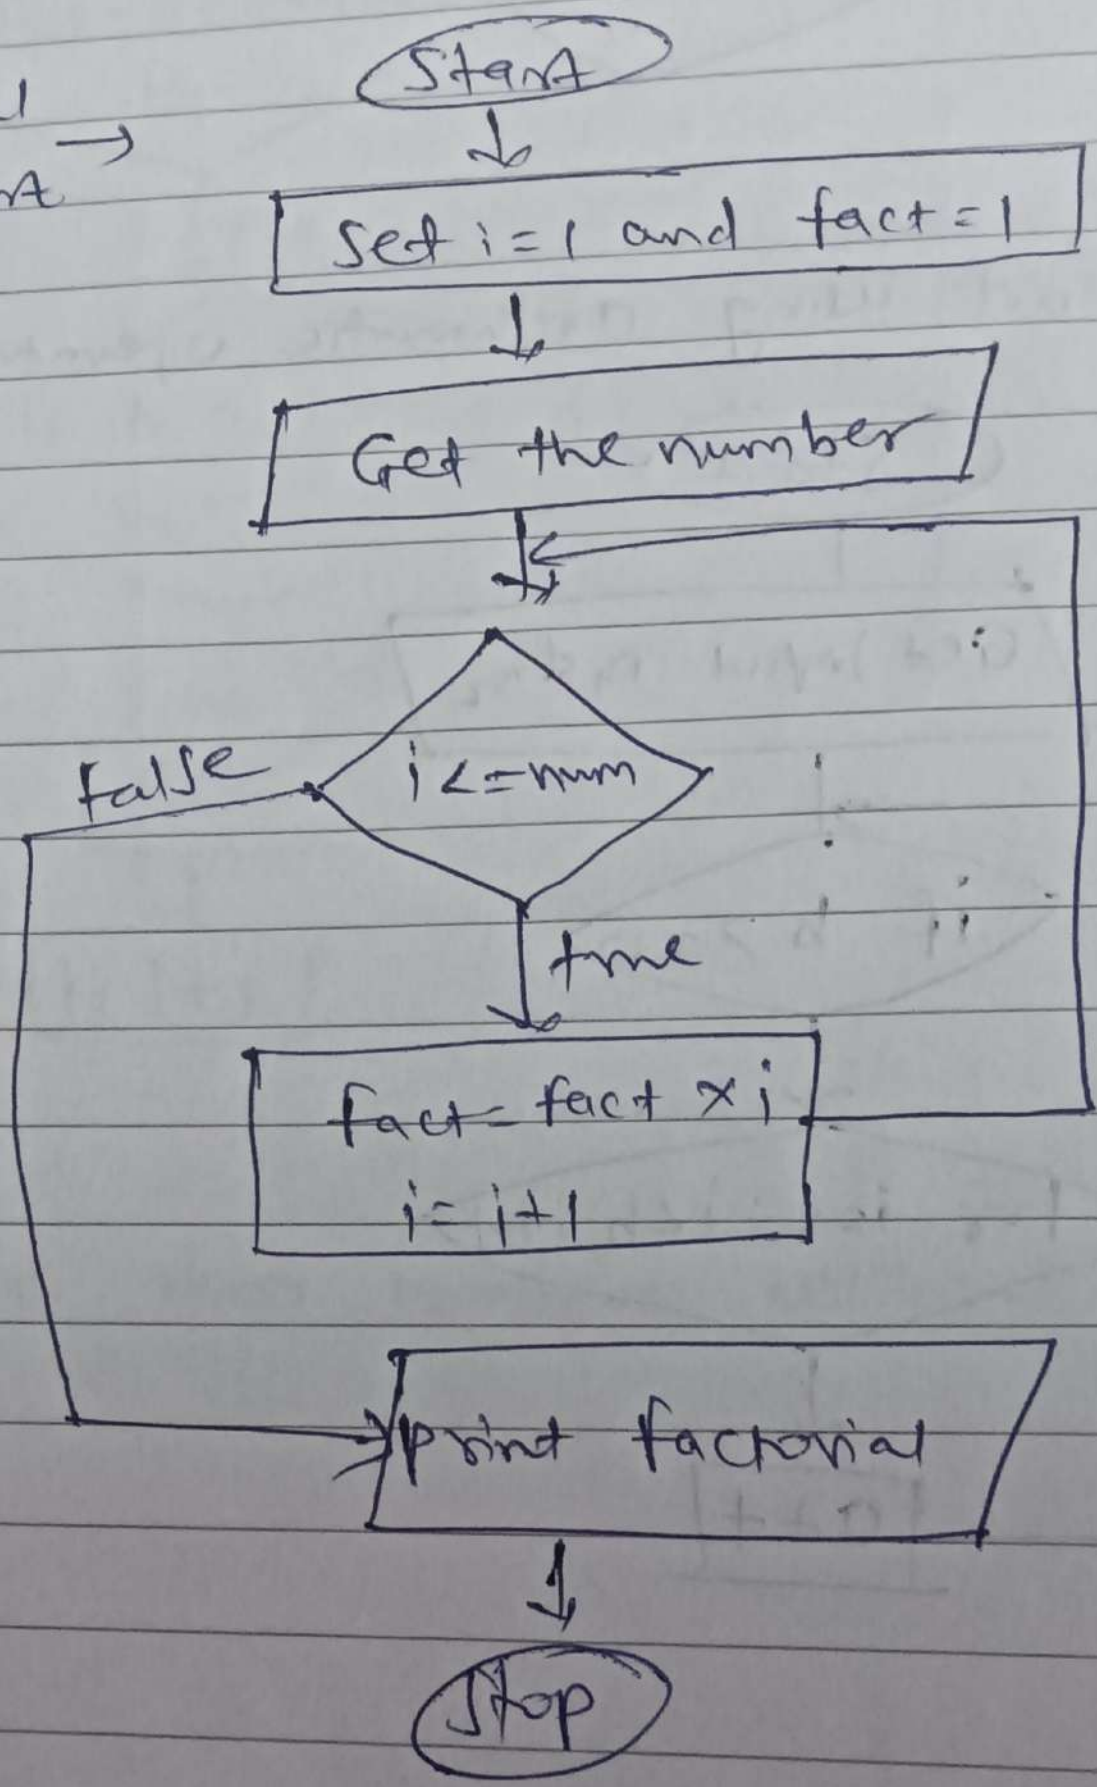

1] Flowchart to check given number is even or odd.

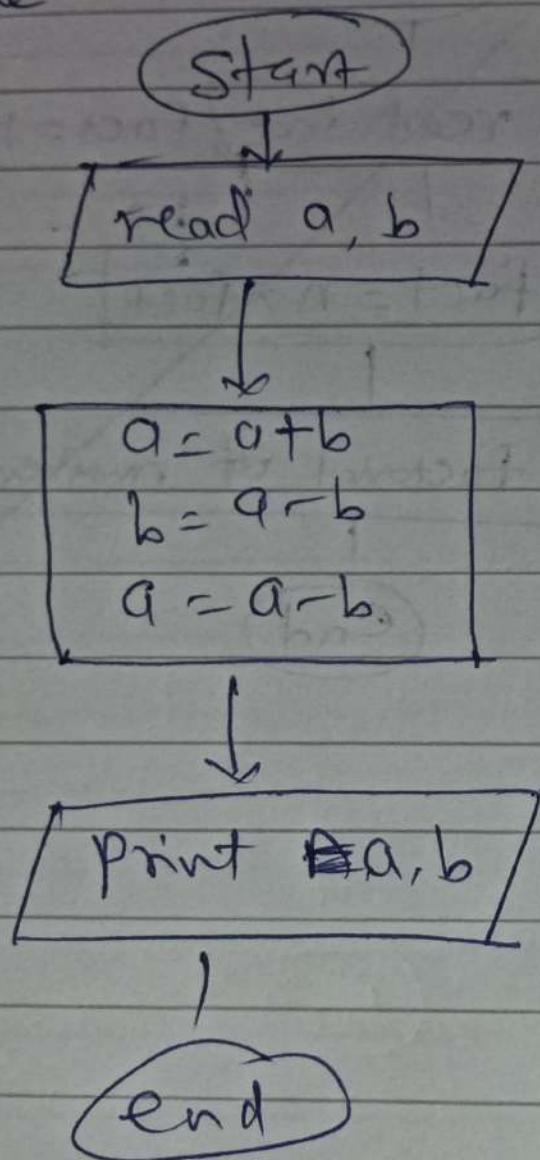

2]

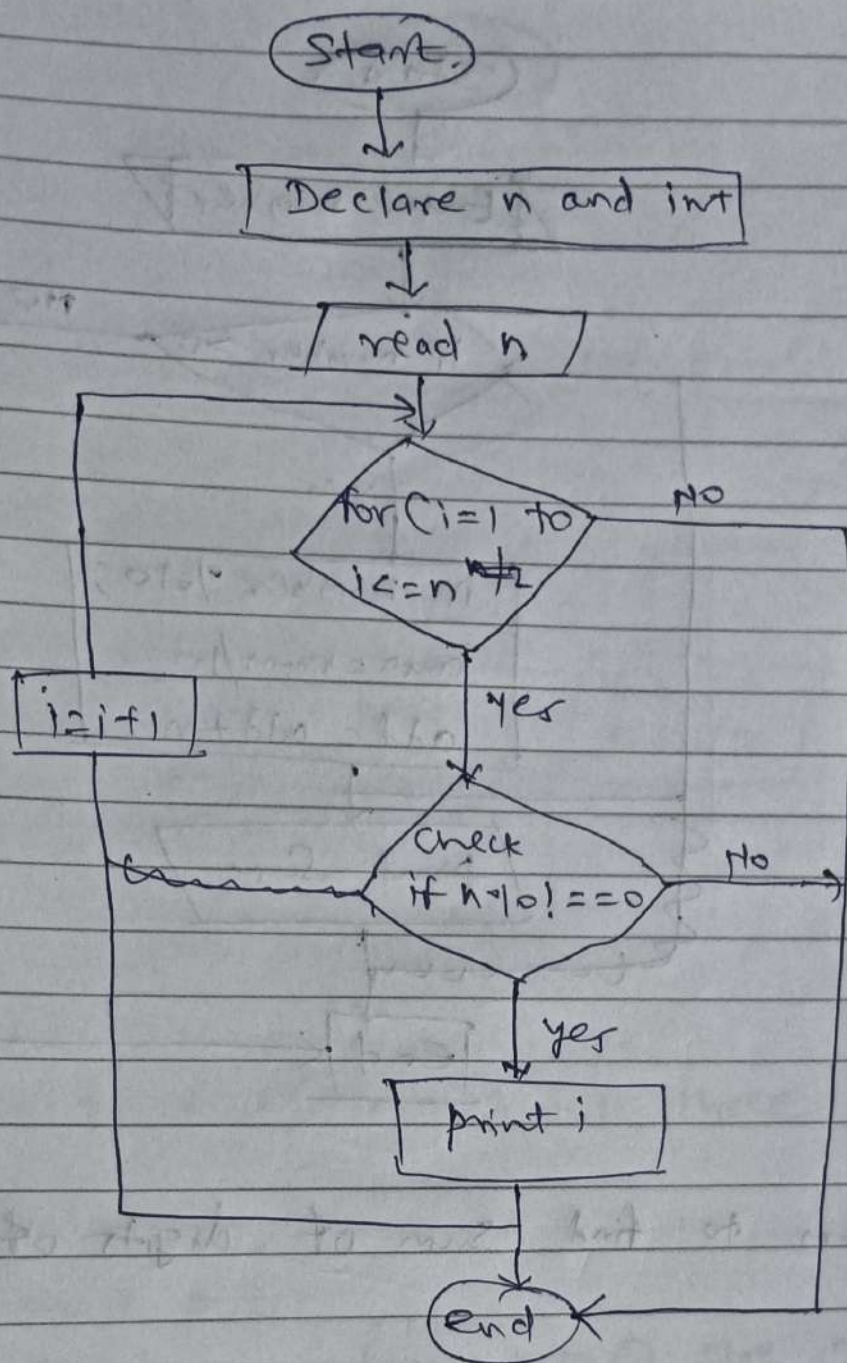

Factorial
Flowchart →

4) Flowchart to swap two numbers without using third variable

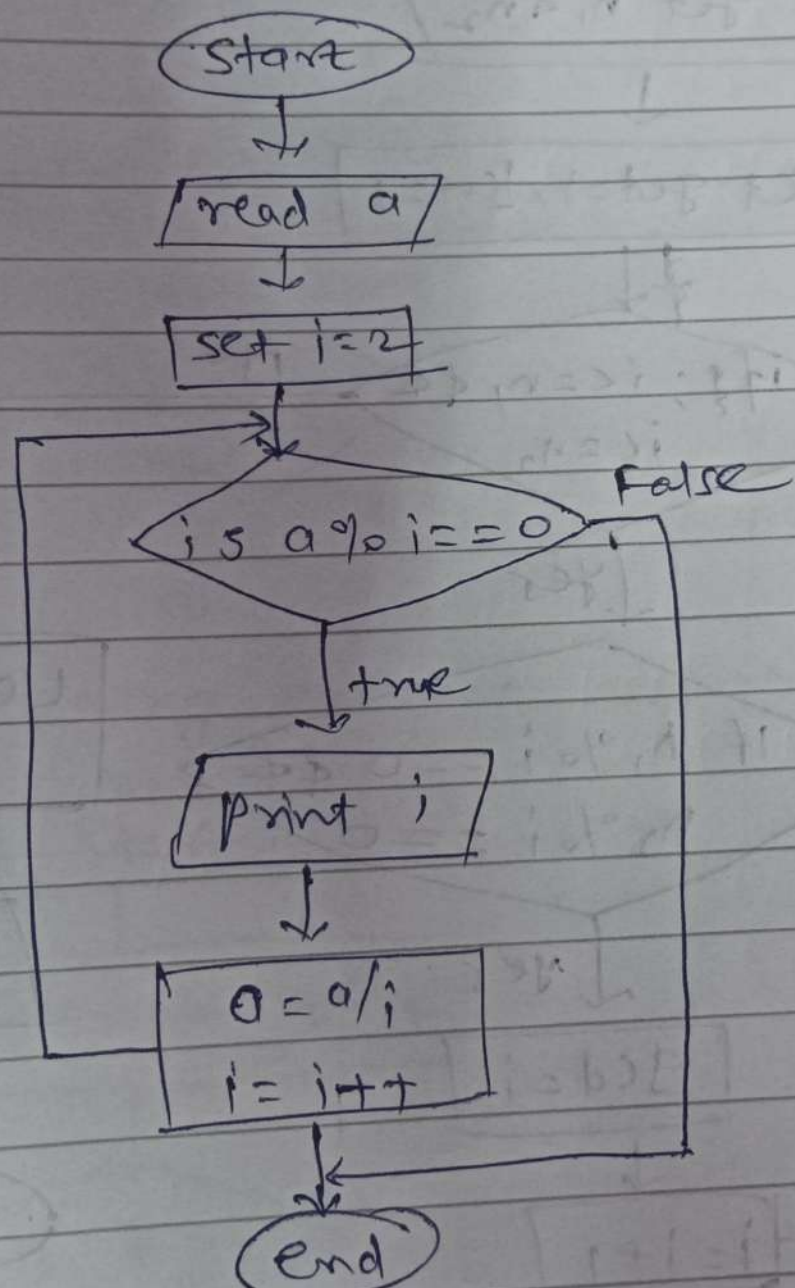

9) Flowchart for factors of a number →

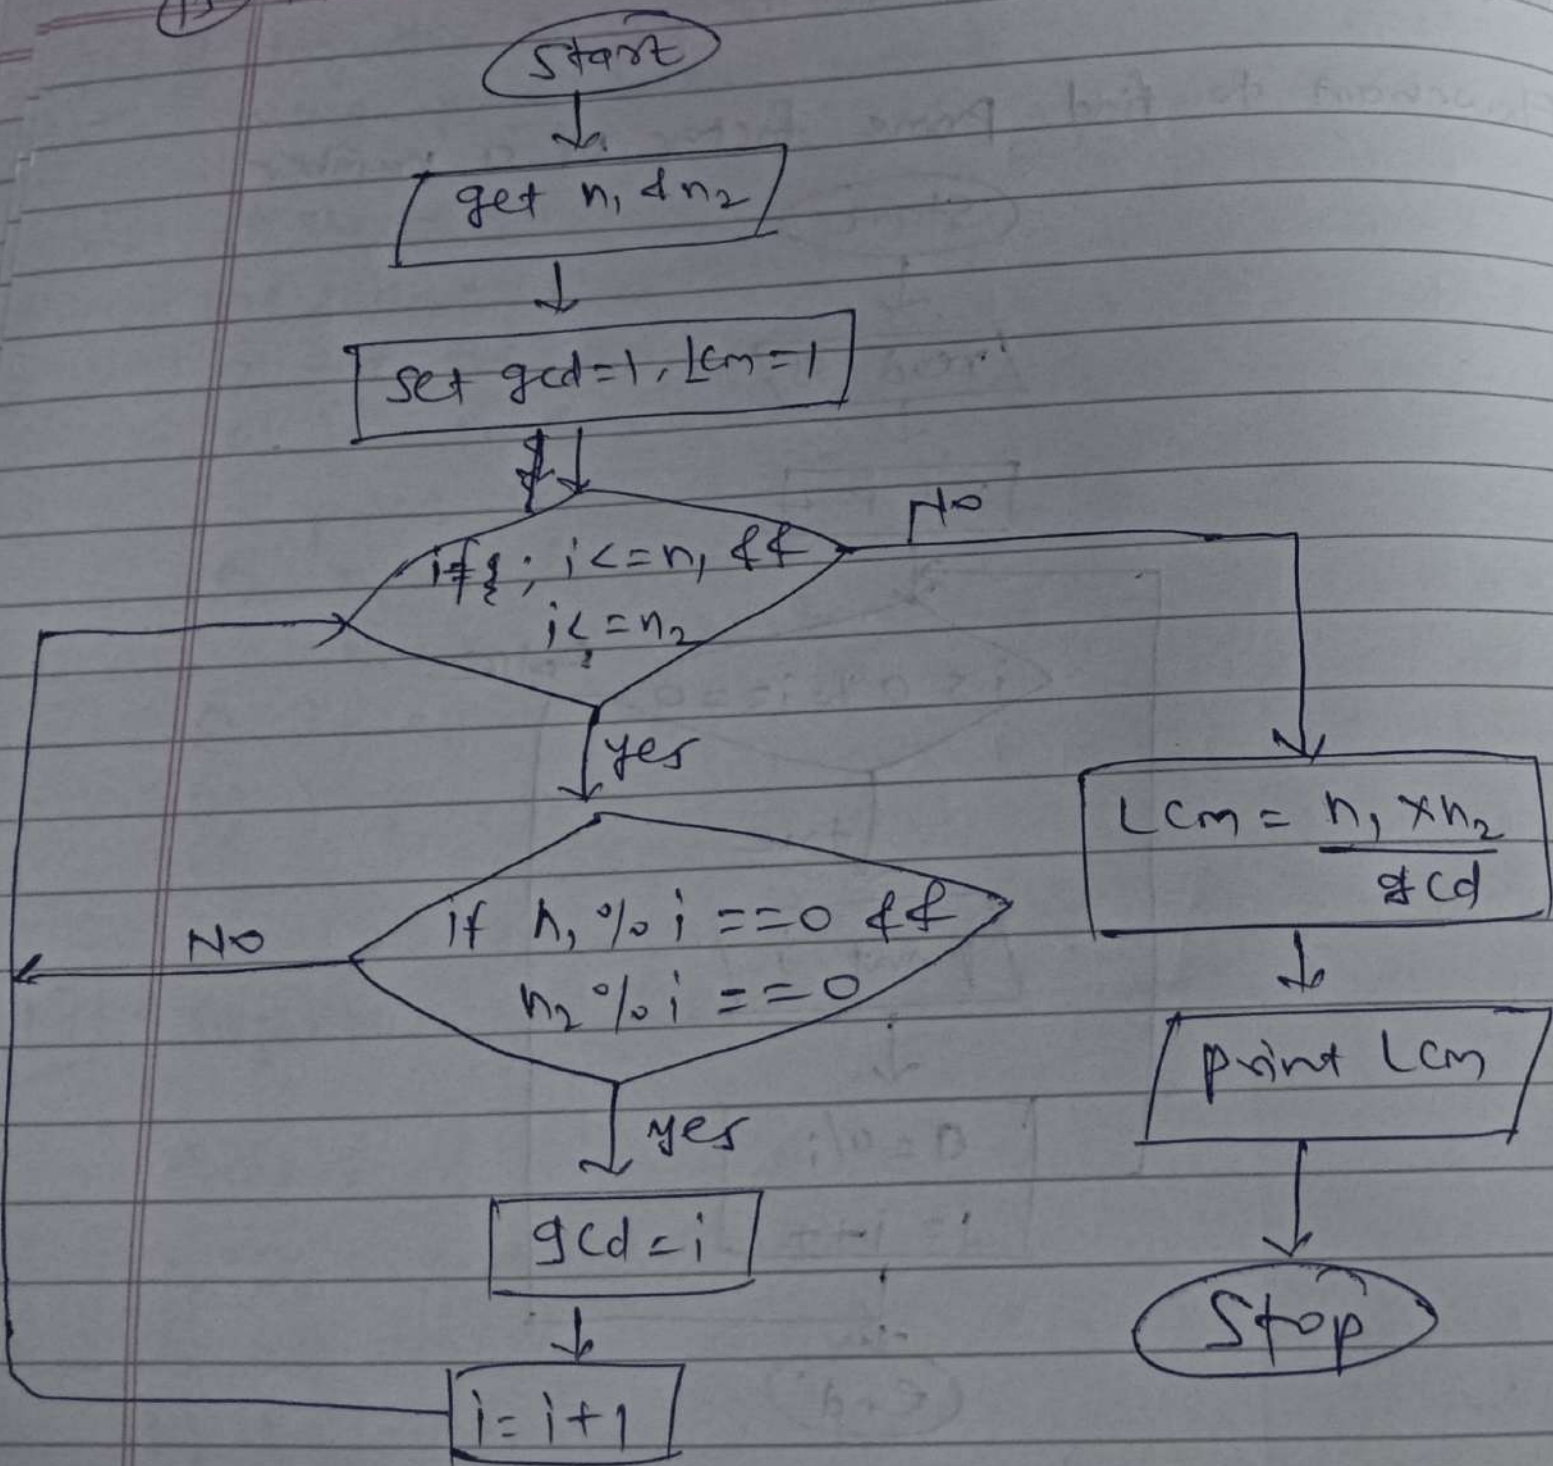

9) Algorithm

- 1) Start
- 2) declare n & int i=1
- 3) get the input
- 4) for (i=1 ; i<=n ; i++) if true print i else go to 6
- 5) i=i+1
- 6) stop

18) Flowchart to find prime factor of a number

15 Flowchart to find Lcm of two numbers

16) Algorithm to find Lcm of two positive integers using prime factor method.

- 1) Start
- 2) declare $i = 2$
- 3) get the input n_1 & n_2
- 4) if $n_1 \% i == 0$ & $n_2 \% i == 0$ is true
print lcm if false go to (6)
- 5) $n_1 = n_1 / i$
 $n_2 = n_2 / i$ go to step (4)
- 6) $i = i + 1$ go to step (4)
- 7) Stop

17) Algorithm to find the given number is palindrome or not

- 1) Start
- 2) Input num
- 3) reverse the number
- 4) if input num == reverse number is true
print palindrome number else print Not a
palindrome number.

18) Algorithm to find prime factor of a number \rightarrow

- 1) Start
- 2) Input num a
- 3) set $i = 2$
- 4) if $a \% i == 0$ is true display i else and
go to (5) else go to (7)
- 5) $a = a / i$ go to (4)
- 6) $i = i + 1$ go to (4)
- 7) end

- 5) Algorithm to check number is positive or negative.
- 1) Start
 - 2) Get the input number
 - 3) if number is greater than zero print positive Number
 - 4) if Number is less than zero print Negative Number
 - 5) if (4) & (5) are false then print number is zero
 - 6) Stop

- 6) Algorithm for leap year
- 1) Start
 - 2) Get the input year 'y'
 - 3) if year is $y \% 400 = 0$ then print 'leap year'
 - 4) else check for $y \% 100 \neq 0$ & $y \% 4 = 0$
 - 5) if (4) is true print leap year else print not a leap year
 - 6) Stop.

- 7) Algorithm to print 1 to 10
- 1) Start
 - 2) declare $a=1$
 - 3) if $a \leq 10$ then print a
 - 4) ~~repeat~~ $a=a+1$
 - 5) repeat (3) ~~until~~ until it becomes false
 - 6) Stop

- 8) Algorithm to print digits of a number
- 1) Start
 - 2) Get the input 'i'
 - 3) if $i \neq 0$ then print $i \% 10$ else go to (5)
 - 4) $int = int / 10$ repeat (3)
 - 5) Stop

Algorithm

① Even odd →

- 1) Start
- 2) read the number
- 3) if ~~the~~ number $\% 2 == 0$ is true go to 4, if false go to 5
- 4) Number is even
- 5) Number is odd
- 6) Stop

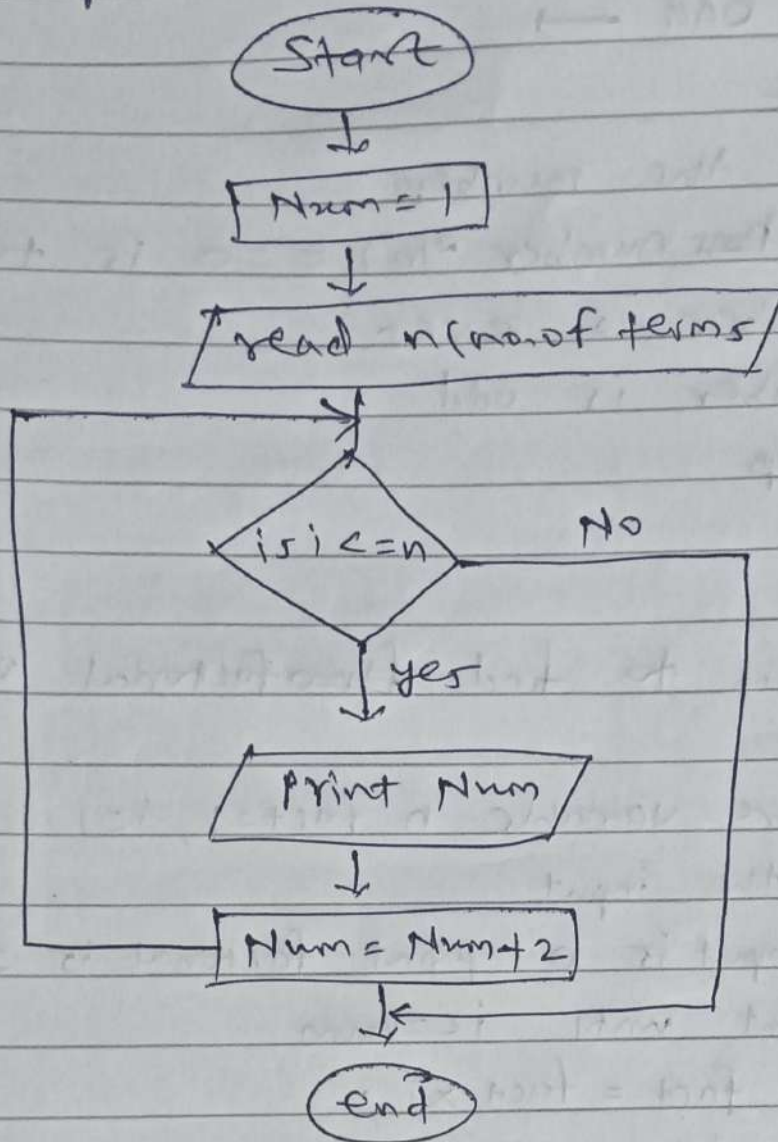

② Algorithm to find ~~find~~ factorial of a given number

- 1) Start
- 2) Declare variable $n, fact=1, i=1$
- 3) Get the input
- 4) if input is 0 print factorial is 1 else
- 5) repeat until $i \leq num$
 $fact = fact \times i;$
 $i++$
- 6) print factorial
- 7) Stop

③ Algorithm to swap two numbers without using third variable

- 1) Start
- 2) Get the input ~~a~~ $a \neq b$
- 3) perform operations
 $a = a + b$
 $b = a - b$
 $a = a - b$
- 4) print Swapped numbers
- 5) Stop

20) Flowchart to print odd number series

20) Algorithm to print odd number series

- 1) Start
- 2) Num = 1
- 3) read the input
- 4) if $i \leq n$ is true go to ⑤ else go to ⑦
- ⑤ print Num
- ⑥ Num = Num + 2 go to ④
- ⑦ end

15) Algorithm to find LCM of two numbers

- 1) Start
- 2) Set $gcd = 1$
- 3) Get n_1 & n_2
- 4) if $i \leq n_1$ & $i \leq n_2$ is true goto 5 else goto 7
- 5) if $n_1 \% i == 0$ & $n_2 \% i == 0$ goto 6
- 6) ~~print~~ $gcd = i$ & $i = i + 1$ goto 4
- 7) $LCM = \frac{n_1 \times n_2}{gcd}$
- 8) print LCM
- 9) Stop
